

PROTECTING THE EARTH

WRITTEN & ILLUSTRATED BY
YU YAU KAN RODNEY

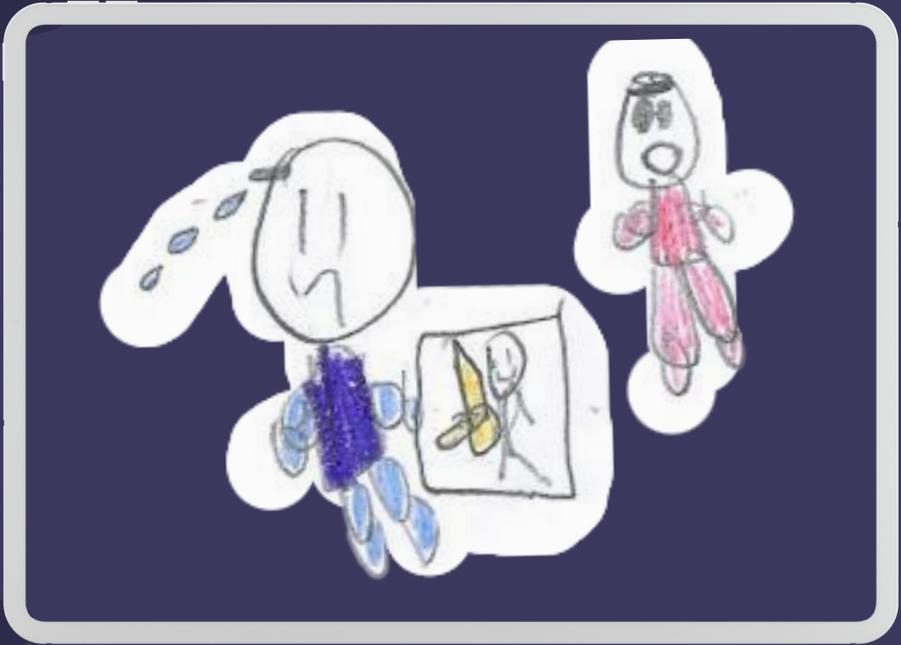

Near the earth in space, there was a spaceship. It had the shape of a cat man robot. It was red and brown all over. It had been floating there for a whole month, spying on the earth closely.

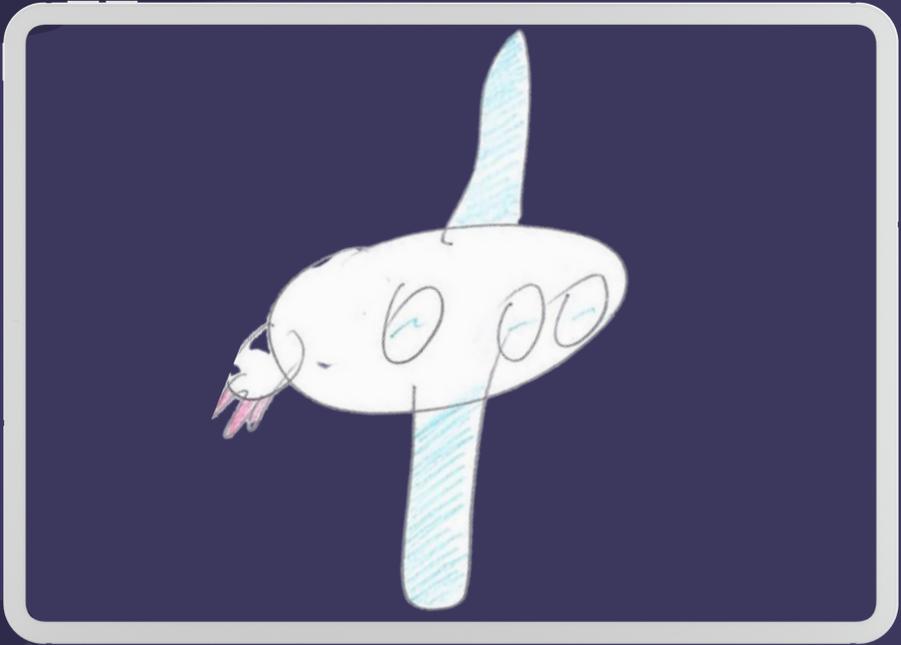

Rodney, the commander of the space station, safeguarded the earth as always. One of his soldiers returned to the station after patrol. He reported, 'There are some spaceships in space.' The soldier showed Rodney some

photos of the spaceships. Rodney was shocked and ordered, 'Send Team A to sneak into the main spaceship and give me a full report.'

After seven days, only one of Team A's soldiers returned. He spoke with his bleeding head, 'Captain Oliver is going to attack earth soon as he knows we have discovered his plan.' He passed out with a photo of Captain Oliver.

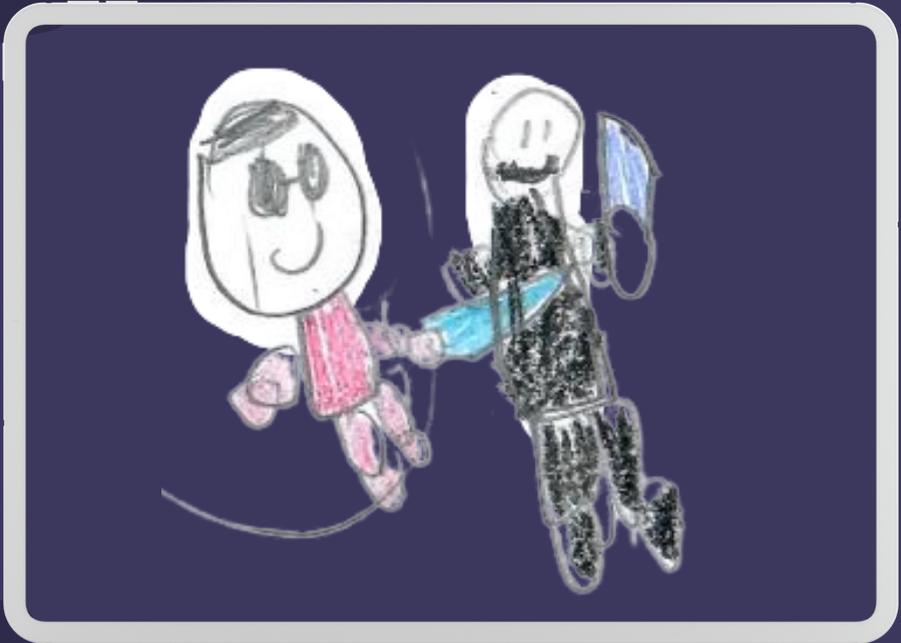

Rodney took the photo and ordered a full attack. He, himself, drove the God Jet to lead the teams. All of them sneaked into the man's spaceship and placed the fussy bombs everywhere.

Once they got out of the
spaceship, it exploded.

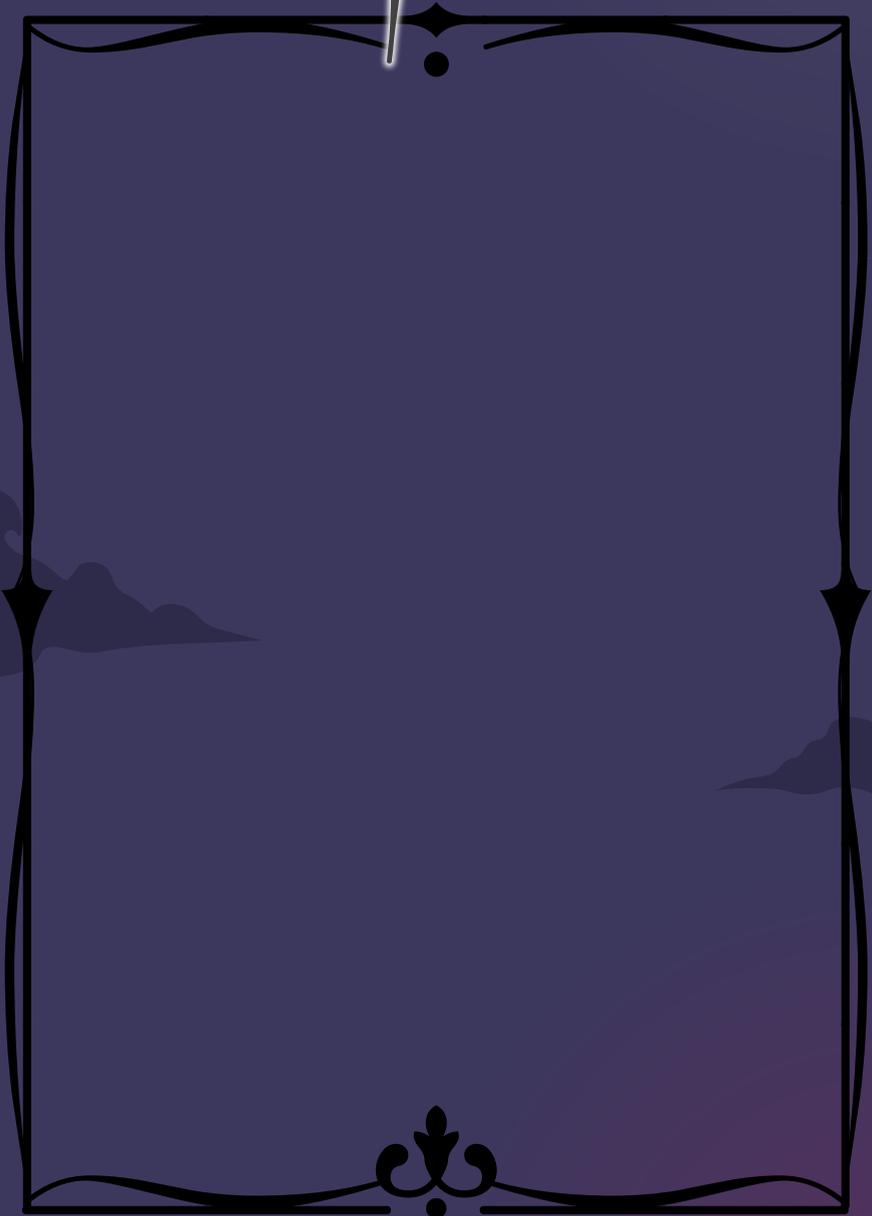

Out came a jet from the side of the explosion. 'That is Captain Oliver!' One soldier shouted. Rodney flew towards Captain Oliver and used his lightsaber to slay Captain Oliver. Oliver was lucky enough to black Rodney. They had a terrible fight.

In the end, Rodney stabbed his lightsaber into Captain Oliver's heart. And then his dead body floated off into space. Rodney returned to earth and received a city as his reward for saving the earth.
